

Claims:

What is claimed is:

1. A medication delivery system comprising:

an arrangement for delivering pre-determined dosages of medication;

5 said arrangement having indicia indicating the dosage to be delivered;

an arrangement for organizing said delivery arrangements; and

 said organizing arrangement having indicia corresponding to the indicia of
said delivery arrangements.

2. The medication delivery system of Claim 1, wherein said indicia is

10 color-based.

3. The medication delivery system of Claim 3, wherein said indicia is a

color selected from the group essentially consisting of blue, yellow, pink, green,
red, and purple.

4. The medication delivery system of Claim 1, wherein said indicia is

15 tactile based.

5. The medication delivery system of Claim 1, wherein said indicia is numerically based.

6. An apparatus for delivering medication comprising:

a barrel containing a pre-determined dosage of medication;

5 a plunger, slidably mounted within said barrel, and extending from the plunger end of said barrel;

a needle for delivering medication extending from the needle end of the barrel;

said apparatus having indicia indicating the dosage of medication to be delivered.

10

7. The apparatus of claim 6, wherein said indicia is color based.

8. The apparatus of claim 6, wherein said color is selected from the group essentially consisting of blue, yellow, pink, green, red, and purple.

9. The apparatus of claim 6, wherein said indicia is tactile based.

10. The apparatus of claim 6, wherein said indicia is numerically based.

15

11. A medication storage and organization system comprising:

an arrangement for storing organizing arrangements for delivering pre-determined dosages of medication;

said arrangement for storing and organizing having indicia indicating the pre-determined dosages of medication contained in the arrangements for delivering the pre-determined dosages of medication.

12. The medication storing and organization apparatus of Claim 11, wherein said indicia is color based.

13. The medication storing and organization apparatus of Claim 11, wherein said indicia is a color selected from the group essentially consisting of blue, yellow, pink, green, red, and purple

14. The medication storing and organization apparatus of Claim 11, wherein said indicia is tactile based.

15. The medication storing and organization apparatus of Claim 11, wherein said indicia is numerically based.

16. A glucometer comprising:

an arrangement for accepting a sample of a patient's blood;

an arrangement for determining a patient's blood sugar range;

an arrangement for displaying said range; and

5 said display comprising indicia.

17. The glucometer of Claim 16, wherein said indicia is color based.

18. The glucometer of Claim 16, wherein said indicia is a color selected
from the group essentially consisting of blue, yellow, pink, green, red, and purple

19. The glucometer of Claim 16, wherein said indicia is tactile based.

10 20. The glucometer of Claim 16, wherein said indicia numerically based.
